

# Your Advanced Therapies CDMO

## Powering the Development and Manufacturing of Advanced Therapies

With gene editing technologies, discovery services, and manufacturing capabilities, ElevateBio is more than your traditional CDMO. We partner with biopharma companies to help them accelerate the development and manufacturing of advanced therapies, spanning treatment of cancer, autoimmune, and rare diseases.

We invest in technology, automation, AI-assisted design, and process innovation so our partners can reach more patients, faster.

### Built for Every Stage of Development

ElevateBio provides services from discovery through commercialization. Our capabilities span the full development journey, so your program never has to restart with someone new.

#### Technologies

- Nuclease Editors
- Base Editors
- RT Editors
- Targeted Gene Insertion
- Epigenetic Editing
- mRNA
- LNP/Delivery
- iPSC Cell Lines
- Generative AI

#### Discovery & Optimization

- Clinical Candidate Design
- Candidate Engineering
- Specificity Assessment
- Pre-Clinical Manufacturing
- Process Development
- Analytical Development

#### Early Clinical

- Technology Transfer
- cGMP Manufacturing
- Process Optimization
- Next-Gen Sequencing
- Lot Release Testing
- Rapid Analytics\*

#### Late-Stage Clinical

- cGMP Manufacturing
- Process Characterization
- Assay Validation
- Process Performance Qualification (PPQ)
- Inspection Readiness
- BLA Support

#### Commercialization

- cGMP Manufacturing
- Product Licensing Inspection
- Continuous Process Verification (CPV)
- Process Industrialization\*
- Manufacturing Optimization\*

## We provide solutions and services across multiple modalities

Cell Therapy

Viral Vector

mRNA

Gene Editing

## Technology and Scale Delivering Better Outcomes

Continuous investment in automation, AI-assisted design, and process innovation to reduce cost and time of your program.

Science, process development, manufacturing, and quality operate under one roof to streamline collaboration.

Processes are built to scale from the start, enabling broader patient reach without increased cost or risk.

Team of industry-leading experts with firsthand experience in the discovery, development, and manufacturing of advanced therapies.

ElevateBio delivers value with top technologies and industry-leading expertise to accelerate timelines and dramatically reduce costs, making these life-saving therapies more accessible.

# Partner with ElevateBio

## Manufacturing Scale-Up & Tech Transfer

For partners with an established program ready for process development, scale-up, or GMP manufacturing.

## Gene Editing Tools & Discovery Services

For partners looking to access our proprietary gene editing technologies, therapeutic design capabilities, and discovery-stage expertise.

### *Proof of Concept Model*

*We typically deliver up to 3 gene editors for your target in under 6 months.*

### *Clinical Candidate Model*

*Leverage our expertise and track record to refine the potency and specificity of your candidate and maximize the likelihood of clinical success.*

### *Pipeline Model*

*This full collaboration model allows you to pursue multiple targets in parallel, accessing any or all of our five editing modalities and tapping into our scientific expertise as you advance your R&D efforts.*

Whether your program is at the concept stage or ready for GMP manufacturing, we meet partners where they are, supporting from **discovery** through **commercialization**.
